Sound Kit: Bring your Auras to life with 7 original sounds, fully customizable and interchangeable for all your needs.

Recommended Use

Although this Asset Package was primarily conceived for the creation of Auras, it does not mean you can't use it for anything else. As a matter of fact, as we experimented with its possibilities, we discovered that these designs allow you to create any magical spell.

Drag and drop one design, from each folder, into your Game Engine. Create a new material and convert it to a particle shader. Assign the design to the material and add the material to the particle system. All of the particles have been converted to the chosen design. Use the particle system's information panel to tweak the particles and achieve the desired look. Once completed, repeat for all the needed designs.

All files are subject to the Store LICENSE.

“We hope you’ll find this package useful while making your game, maui cìn Aura mìr”.
